Famous Scotch Regiment.
Many people in many countries have heard of the Black Watch, comparatively few have heard of the 42nd Highlanders, yet the name is of the same regiment. The 42nd, the oldest of all Highland Regiments, was the first to be formed in 1793. When the regiment was first formed it was used chiefly to suppress insurrection in Scotland, to enforce the discipline of the army, and to suppress unauthorized assemblies. A special tactic from which all bright colors were eliminated was designed for regimental use, and this fact, together with the police nature of the duties of early days, led to the name Black Watch. On many fields, in many parts of the world, have the soldiers of the Black Watch upheld the glory of this great regiment.

Good Work of Humble Worm.
Worms are great promoters of vegetation by boring, perforating and loosening the soil and rendering it porous to rain and the fibers of plants by drawing extra and at times of late, to the soil. It is, in fact, the most important of all insects, and is the cause of much of the fertility of the soil. The earth without worms would soon become cold, hard, and infertile. The worms have been called the "little farmers" of the soil, and their work is the most important of all. They are the cause of much of the fertility of the soil, and their work is the most important of all.

For Burns and Scalds.

Apply glycerin and flour, the latter heated on the affected part to keep off the air. On this put a good pad of cotton wool and bandage.
